

Welcome to Sulzer Turbo Services in Indonesia

Sulzer Turbo Services Indonesia is located 70 km east of Jakarta in Purwakarta. It operates comprehensive, well-equipped workshop facilities that offer a wide range of services to the rotating equipment market. The company is the leading independent turbomachinery service center in South East Asia.

PT Sulzer Turbo Services Indonesia is a well-established, state-of-the-art rotating-equipment service center that was founded in 1994. It has 160 employees. The company offers shop and field engineering services, including the remanufacturing, repair, upgrading, and reconditioning of:

- gas and steam turbines,
- generators,
- centrifugal, axial, and screw compressors,
- expanders, and
- other related equipment.

In addition, Sulzer Turbo Services offers a full range of in-house value-added services and around-the-clock technical support. Its 1200 m² big bay with 100-ton crane capacity and heavy equipment handling allows easy handling of large turbines. The facility has cutting-edge equipment that enables it to offer precision machining, inspection, and coating capabilities. Specialized balance services like moment weighting can be performed on rotating equipment up to 85 tons

State-of-the-art rotating-equipment service center of Sulzer Turbo Services Indonesia.

and four meters in diameter. The engineering team is able to make quick and efficient evaluations on the equipment and propose technically sound, cost-effective solutions to customers. The company also supports operators of all types of centrifugal and axial compressors with inspection, disassembly, overhauls, repairs, replacement parts manufacturing, and troubleshooting.

To be able to provide this high level of service, Sulzer Turbo Services gives much emphasis to the training of the employees. Sulzer Turbo Services rigorously inspects every unit it receives, and it documents inspections and repairs in a data package. This documentation provides customers all the information they need for analysis and record keeping. The company is compliant with the requirements of applicable ISO, IMI, API, ASTM, ASNT, ASME, and AWS specifications.

Sulzer Turbo Services Indonesia has been able to provide tailor-made solutions

to help operators of rotating equipment significantly boost productivity and reduce costs. In partnership with its customers, the company has established operations, maintenance, and service agreements that truly create value and provide quantifiable positive results. Sulzer Turbo Services has materials and applied metallurgy expertise relevant to industrial equipment operators in a wide range of industries. Sulzer Turbo Services Indonesia has trained and certified inspectors who are familiar with the latest range of materials, inspection methods, and examination criteria required by industrial companies.

Thanks to the fully equipped tool containers, which can be shipped anywhere to support field service operations, Sulzer Turbo Services supports its customers at their sites quickly and effectively.
