

Pumping and mixing specialist for the sulfur industry

Proven expertise

With long experience and in-depth knowledge of demanding molten sulfur and sulfuric acid process applications, Sulzer offers:

- Proven application experience and global references
- Custom engineered solutions to meet specific application needs
- Wide range of product offerings; horizontal, vertical, steam jacketed pump configurations

Value you can count on

- Extending mean time between maintenance (MTBM)
- Lowest cost of ownership
- High product reliability and quality

Material competence

- Specialist competence in corrosive and erosive applications, built on leading material technology and proven field experience
- Pump designs consider both materials of construction and hydraulic requirements to optimize performance in the field
- Continuous research and ongoing product development to meet evolving requirements

Molten sulfur

- Melting unit
- Filtration unit
- Intermediate storage
- Transfer

Sulfuric acid

- Absorption tower
- Drying tower
- Heat recovery system
- Transfer

Extensive product coverage

Through a wide portfolio, Sulzer brings you innovative pumping, mixing and agitation solutions, as well as services for the sulfur process industry, also including energy-efficient products for industrial water treatment. Advanced materials and a wide range of shaft seals and sealing systems combined with overall operating efficiency ensure a reliable process and long service life.
