

Sulzer in South Africa

Hydromining and dewatering expertise

Sulzer supports the mining industry in South Africa with both its manufacturing expertise and highly responsive field services teams to ensure equipment is delivered and maintained to the highest standard.

Enhanced reliability and efficiency

As an OEM, Sulzer has unique capabilities that deliver best-in-class reliability, efficiency and performance for pumps and hydromining equipment. Our robust rock drills and thrust legs deliver high torque and excellent penetration rates, even in the most arduous environments.

Sulzer is the only supplier of pneumatic drills without oil lubrication, offering an improved working environment and easier maintenance. The hydromining product lineup also includes hydro-powered rock drills with recirculated cooling water as well as lightweight versions for easier handling.

Ground-breaking products

- NGD Hydro-powered drill (standard, recirculating and lightweight versions)
- ADD Pneumatic drill
- Hydro-powered thrust legs (standard and stope applications)

Enhanced maintenance services

- On-site fleet maintenance – one-shift turnaround
- Services cover non-OEM equipment
- Off-site services and support for smaller fleets
- 100% availability, consignment stock
- Tailored services and maintenance support
