Sulzer flow technology selected for net zero biofuel production in Canada to reduce emissions by up to 3 million tonnes per year

Sulzer was recently selected by a major energy producer in Canada that is using local canola (rapeseed) oil to produce renewable diesel at industrial scale. The innovative process will rely on a range of Sulzer flow equipment, including specially designed centrifugal pumps. The biofuel will be used to power vehicles, trains and industrial boilers, realizing an annual carbon reduction of up to 3 million tonnes — the equivalence of taking 650,000 vehicles off the road.

Sulzer has been selected to supply a range of pumps for an innovative project in Canada that will utilize locally grown rapeseed as bio-feedstock for net zero diesel production. This includes reliable centrifugal pumps designed by Sulzer to ensure the necessary high pressure and high temperature, which are critical to the catalytic process that breaks down the canola oil. Completion of the refinery expansion is planned for March 2024, with anticipated net zero diesel output of one billion liters per year once operating.

Sulzer's Executive Chairwoman Suzanne Thoma said: "Decarbonizing the transportation sector is crucial to sustainability and net zero targets. We are very proud to continuously help these pioneering technologies and processes advance and contribute with our technical expertise and flexibility in product design to ensure the highest levels of efficiency."

Sulzer is a global leader in fluid engineering and chemical processing applications. We specialize in energy-efficient pumping, agitation, mixing, separation, purification, crystallization and polymerization technologies for fluids of all types. Our solutions enable carbon emission reductions, development of polymers from biological sources, recycling of plastic waste and textiles, and efficient power storage. Our customers benefit from our commitment to innovation, performance and quality through our responsive network of 180 world-class manufacturing facilities and service centers across the globe. Sulzer has been headquartered in Winterthur, Switzerland, since 1834. In 2022, our 12'900 employees delivered revenues of CHF 3.2 billion. Our shares are traded on the SIX Swiss Exchange (SIX: SUN). www.sulzer.com
