Sulzer to expand electromechanical services offering to Southern California

Sulzer acquires Brithinee Electric, a leading independent electromechanical service provider in Southern California, USA. Last year, Brithinee recorded annual sales of about USD 10 million with a workforce of 46 employees.

Sulzer has acquired Brithinee Electric of Colton, California. Through this acquisition, Sulzer expands its electromechanical services business into Southern California and gains access to the Californian wind, cement and water markets with established offerings and customers.

Founded in 1963, Brithinee offers electromechanical repair services, remanufacturing, redesign, upgrades, and modifications as well as custom electric control panel systems. The facilities are located in Colton, CA, USA. Integration will start immediately after closing.

Jim Mugford, President Sulzer Electro Mechanical Services says, "Brithinee strongly complements our existing service network in the Western United States and Texas. The company has an outstanding reputation with its customers, including key customers in renewable power generation and water as well as wastewater markets. With this acquisition, we look forward to welcoming Brithinee to the Sulzer team."

Sulzer's core strengths are flow control and applicators. We specialize in pumping solutions and services for rotating equipment, as well as separation, mixing and application technology. Our customers benefit from a network of over 180 production and service sites around the world. Sulzer has been headquartered in Winterthur, Switzerland, since 1834. In 2017, we achieved sales of roughly CHF 3 billion with around 14'700 employees. Our shares are traded on the SIX Swiss Exchange (SIX: SUN). www.sulzer.com
