# ENDO EVACUATION NEEDLES

## Luer Lock, sterile Apical Side Vent

The **Transcodent Endo Evacuation Needles** provide new options for safe and precise root canal treatments. Produced with the **Spherigator technology**, the lateral opening is positioned as close as technically possible to the tip of the tube. The tip itself is rounded and closed to enable maximal Apex protection. The needles can be used with Luer Lock Syringes for standard irrigation or with the Transcodent Luer Lock handpiece for the precise evacuation of cleansing solution as part of a passive root canal cleaning procedure. The cannula tube is equipped with four laser marks, which serve as root canal depth indicator.

PU: 25 pieces

### FEATURES

- Easy to bend for perfect access to the root canal
- Apical side opening, closest to the Apex
- Cannula with four laser marks
- Recommended for use with the Transcodent Luer Lock handpiece for saliva ejector
- Sterile, individually packed in containers

DIAMETER (GAUGE)	SIZE (MM)	REF	COLOUR CODE	PACKAGE (PIECES)
27	0.4×32	6270	grey	25
30	0.3×32	6271	yellow	25

## Luer Lock Handpiece

for suction needles | Art.-Nr.: FC0003100
