ENDO IRRIGATION NEEDLES

Luer / Luer Lock 2-Side Vent

The **Transcodent Endo Irrigation Needle** double side vent is the only Transcodent Irrigation Needle with two lateral vents for gentle but effective irrigation of the root canal. Penetration of the apex is avoided due to the closed, rounded tip, thereby the full length of the root canal may be safely irrigated. This thin-walled needle, with up to 30% improved flow rate, offers better irrigation and provides more flexibility.

PU: 25 pieces

DIAMETER (GAUGE)	SIZE (MM)	REF	COLOUR CODE
23	0,6×25	6400	blue
25	0,5×25	6401	orange
27	0,4×25	6402	grey
