Trusted expertise in domestic and commercial wastewater
Any project, any wastewater application

Wastewater poses a complex challenge, no matter whether it originates in a single house or a multi-family home, a commercial building or an industrial complex. Whatever the property, Sulzer is the ideal wastewater partner from the start of the project to its final sign-off.

Sulzer has vast experience in the handling of domestic and commercial wastewater. We are dedicated to helping professionals design, select, install and service any type of wastewater system. At our disposal are all the solutions needed to keep a building running smoothly.

Our extensive range of products includes drainage pumps, sewage pumps with Contrablock and vortex hydraulics, prefabricated lifting stations for both internal and external installation, and solutions for monitoring and control. These are the result of advanced R&D, built on an engineering heritage comprising over 100 years of pump design and installation.

In total, Sulzer expertise means reliable and efficient pumping with minimized operating costs. Our solutions come with everything you need, ensuring easy, plug-and-play installation with a minimum of time and set-up.
Domestic applications
Domestic properties pose wastewater challenges both large and small. In addition to waste disposal from toilets, there are diverse sources of drainage and grey wastewater including not only sinks and showers, but also drainage from yards and gardens. The high reliability of Sulzer pumps and lifting stations offers security for metropolitan and remote properties alike.

Commercial applications
Commercial properties share many challenges with domestic properties when it comes to pumping and lifting, but their more diverse uses can also mean special demands. Sulzer pumps and lifting stations reliably move not only wastewater with a high proportion of solid or fibrous matter, but also aggressive and even chemically contaminated wastewater. For installations with extreme solid particles, our two-shafted, low speed and high torque grinders will slice through rags and wipes that are loading the pumping stations.

Trusted expertise in domestic and commercial wastewater
Sulzer offers solutions for quick and effective collection of wastewater from residential and public properties, and for transferring it to the municipal wastewater network. Small wastewater pumps, lifting stations, prefabricated pumping stations and equipment for monitoring and control are all a part of the process.

Product overview

Submersible light and medium duty pumps

Light drainage pump type ABS Robusta 200-300

Features and benefits

The Robusta has been designed for pumping clear and wastewater from house, garden or yard and can pump down to a very low water level. It is supplied with built-in level control and check valve and is suitable for manual or automatic operation.

Key characteristics

<table>
<thead>
<tr>

Light drainage pump type ABS Coronada 250

Features and benefits

The Coronada is a submersible stainless steel pump for removing clear and aggressive wastewater from areas such as drainage pits, gullies and flooded cellars. Also for drainage of swimming pools, circulation in ponds, and for emptying and filling of containers. Available with KS float switch for automatic level control. A special SX version for particularly aggressive liquids is also available.

Light drainage pump type ABS IP 900

Features and benefits

The ABS light drainage pump IP is a stainless steel pump for corrosive media with vortex hydraulics. It is suitable for pumping aggressive media with a high proportion of solid or fibrous matter. The IP is also ideal for dewatering of chemically contaminated wastewater, industrial effluent, and for use in agriculture.

Key characteristics

Light wastewater pump type ABS MF 154 HW

Features and benefits

The MF 154HW is a compact submersible pump for the removal of domestic and commercial high temperature wastewater that can contain solids up to 20 mm. The pump has been designed to cover a wide range of internal and external dewatering applications, but primarily where the temperature of the medium exceeds the standard upper limit (40°C) to a maximum allowable temperature of 80°C. Option without KS float switch available.

Light wastewater pump type ABS MF 154-804

Features and benefits
The MF 154-804 is a compact submersible wastewater pump range with vortex impeller for trouble-free operation. The pumps are used for dewatering of buildings and for pumping fluids from low lying locations. Level control switch is an option.

Key characteristics
- Capacity: 58 m³/h
- Head: 16 m
- Temperatures: 40°C, max. 60°C for 5 min
- Discharge sizes: G 1 ¼"-G 2"/DN 65
- Maximum speed of rotation: 2'900 min⁻¹

Submersible wastewater pump type ABS AS 0530-0841

Features and benefits
The AS is a robust and reliable submersible pump for the removal of clear water, wastewater, and sewage from buildings and sites. The pump range from 1.0 to 3.0 kW, and is suitable for portable as well as stationary installations. Hydraulics with Contrablock or vortex impellers ensure blockage-free operation.

Key characteristics
- Capacity: 100 m³/h
- Head: 28 m
- Temperatures: 40°C, max. 60°C for 5 min
- Discharge sizes: DN 50, DN 65, DN 80
- Maximum speed of rotation: 1'450 min⁻¹, 2'900 min⁻¹

Submersible grinder pumps

type ABS Piranha 08-09 / Piranha S 10-30 / Piranha PE / Piranha HH 60 Hz

Features and benefits
Piranha sewage pumps with shredding action provide reliable and economical discharge of effluent under pressure in private municipal and communal schemes. They offer an economical alternative to gravity sewers, and improve environmental protection for pressurized sewer systems.

Key characteristics
- Capacity: 21 m³/h
- Head: 71 m
- Discharge sizes: G 1 ¼" / DN 32-DN 50

Submersible heavy duty pumps

Submersible sewage pumps type ABS XFP 1.3-30 kW

Features and benefits
Designed for use in standard and network pumping stations. Suitable for both wet and dry installation submersible sewage pump type ABS XFP models PE1 to PE3 using premium-effciency IE3 motors. The XFP pumps offer significant energy saving using IE3 motors, excellent rag handling, long-term reliability and a future proof design.

Key characteristics
- Capacity: 792 m³/h
- Head: 70 m
- Discharge sizes: DN 100-DN 200
Lifting stations

Lifting stations type ABS Piranhamat 100-120

Features and benefits
The Piranhamat 100-120 is designed for domestic wastewater removal from one WC located below the sewer backwash level. It is also possible to connect one wash-hand basin, one shower and one bidet to the unit. The Piranhamat 100-120 is gas- and odour-tight, plug-in-ready, and fitted with a Piranha grinder pump.

Key characteristics
- Capacity: 5.5 m³/h
- Head: 9 m
- Temperatures: 40°C, max. 60°C for 5 min
- Discharge sizes: DN 25, DN 32

Lifting station type ABS Sanimax

Features and benefits
The Sanimax is a compact lifting station suitable for installation at floor level near the wastewater source below the sewer backwash level. Flood-proof, with an odour-preventing vent system, Sanimax removes wastewater from wash-hand basins, washing machines and showers. Fitted with Robusta or MF pump.

Key characteristics
- Capacity: 14 m³/h
- Head: 11 m
- Temperatures: 40°C, max. 60°C for 5 min
- Discharge sizes: DN 40
- Maximum speed of rotation: 2’900 min⁻¹

Lifting station type ABS Nirolift

Features and benefits
The Nirolift is a synthetic, single pumping station for the pumping of faecal-free wastewater such as the discharge from washing machines, sinks, dishwashers, showers and bathtubs. For below-ground installation in buildings below the sewer level. Fitted with a Robusta, Coronada or MF pump.

Key characteristics
- Temperatures: 40°C, max. 60°C for 5 min
- Discharge sizes: DN 40 with 50 mm Plasson adaptor

Lifting stations type ABS Sanisett 1 and 2

Features and benefits
The Sanisett is a synthetic, single or twin pumping station for the pumping of faecal-free wastewater such as the discharge from washing machines, sinks, dishwashers, showers and bathtubs. For above- or below-ground installation in buildings and areas below the sewer level. Fitted with Robusta, Coronada, IP, Piranha or MF pumps. For applications where pumping must not be interrupted the twin pumping station unit should be installed.

Key characteristics
- Temperatures: 40°C, max. 60°C for 5 min
- Discharge sizes: DN 50 with 63 mm Plasson adaptor
Lifting station type ABS Piranhamat 701

Features and benefits
The Piranhamat 701 is a flood-proof lifting station for automatic sewage removal from areas below the backwash level. This unit is fitted with one ABS Piranha submersible grinder pump suitable for pumping domestic wastewater. This lifting station is ideal for locations where the diameter of the discharge line is restricted.

Key characteristics
- Capacity: 9 m³/h
- Head: 30 m
- Temperatures: 40°C, max. 60°C for 5 min
- Discharge sizes: G 1 ¼”
- Maximum speed of rotation: 2’900 min⁻¹

Lifting station type ABS Piranhamat 1002

Features and benefits
The Piranhamat 1002 is a two-pump version of the Piranhamat 701 for applications where the additional security of a second pump is required. This unit is fitted with two ABS Piranha submersible grinder pumps.

Key characteristics
- Capacity: 9 m³/h
- Head: 30 m
- Temperatures: 40°C, max. 60°C for 5 min
- Discharge sizes: G 1 ¼”
- Maximum speed of rotation: 2’900 min⁻¹

Lifting stations type ABS Sanimat 1000-2002

Features and benefits
The Sanimat 1000-2002 is a single pump flood-proof lifting station for automatic removal of domestic wastewater from areas below the backwash level. Robust, synthetic (PE), easy to transport, 70 litre collection tank of compact design.

Key characteristics
- Capacity: 55 m³/h
- Head: 9.5-18 m
- Temperatures: 40°C, max. 60°C for 5 min
- Discharge sizes: Discharge flange DN 80, plus flanged socket with 4” sleeve and clips (for discharge pipe DN 80/100)
- Maximum speed of rotation: 1’450 min⁻¹, 2’900 min⁻¹

Lifting station type ABS Sanimat 4002

Features and benefits
The Sanimat 4002 is a flood-proof lifting station for automatic removal of domestic and commercial wastewater from areas below the backwash level. Designed for large buildings, multi-family housing units, hotels, hospitals, etc. Compact design but large storage capacity. Fitted with XFP sewage pumps up to 6 kW.

Key characteristics
- Capacity: 45 m³/h
- Head: 18 m
- Temperatures: 40°C, max. 60°C for 5 min
- Discharge sizes: Discharge flange DN 80 and DN 100
- Maximum speed of rotation: 980 min⁻¹, 1’450 min⁻¹
**Lifting stations type ABS Synconta 700 and 700L**

**Features and benefits**
The Synconta is a synthetic prefabricated sump. Designed as a single pumping station for the effective dewatering of buildings, and pumping of sewage containing faecal matter from areas below the sewer level.

**Key characteristics**
- Temperatures: 40°C, max. 60°C for 5 min
- Discharge sizes: DN 32

**Lifting stations type ABS Synconta 901B and 902B**

**Features and benefits**
Synthetic prefabricated sump, designed as a single or double pumping station for the automatic pumping of wastewater and sewage from locations and areas below the backwash level in accordance with EN 12050-1. Designed as a complete wastewater sump for below-ground installation and for fitting with pumps from the Piranha, AS and MF ranges.

**Key characteristics**
- Temperatures: 40°C, max. 60°C for 5 min
- Inflow ports: DN 100, DN 150, DN 200

**Sewage grinders**

**Muffin Monster™ – Inline/open channel grinders**

**Features and benefits**
Inline and open channel Muffin Monster grinders are designed to protect pumps and other critical equipment from clogs and damage. They shred tough solids in wastewater and rags. The dual-shafted, slow speed and high-torque grinders give a wide grinder capability. The grinders are available with Wipes Ready™ technology which prevents materials from forming long stripes and reweaving.

**Key characteristics**
- Capacities: up to 1'558 m³/h
- Connections: 100 to 500 mm
- Pressures: up to 6 bar
- Cutting chamber: up to 1'500 mm

**Channel Monster™**

**Features and benefits**
High flow Channel Monster grinders protect inlet works and treatment plants from damaging solids. The rotating screening drums allow fluid to pass through while capturing solids and diverting them to the powerful dual-shafted grinder for shredding. Channel Monsters can protect equipment in commercial wastewater pump stations. The grinders are available with Wipes Ready™ technology which prevents materials from forming long stripes and reweaving.

**Key characteristics**
- Capacities: up to 2'775 m³/h
- Cutting chamber: up to 1'500 mm
- Bearing life: 100'000 h
Monitoring and control equipment

Leakage relay type ABS CA 461

Features and benefits
CA 461 is designed to detect leakage in pumps and mixers. The amplifier is housed in a norm enclosure fitted for DIN-rail mounting. The unit is available in two executions, 24 VDC or 110-230 VAC supply.

Temperature and leakage relay type ABS CA 462

Features and benefits
CA 462 is designed to spy and detect temperature and leakage in pumps and mixers. The amplifier is housed in a norm enclosure fitted for DIN-rail mounting. The unit is available in two executions, 24 VDC or 110-230 VAC supply.

Pump controller type ABS PC 111 and 211

Features and benefits
The PC 111 and 211 are easy-to-use single (PC 111) and dual-pump (PC 211) controllers designed mainly for use in either gravitation or pressurized municipal wastewater pumping stations. Their numerous features improve pumping station functionality and reliability throughout its life-cycle.

Equipment controller EC 531

Features and benefits
The equipment controller EC 531 is an all-in-one unit for monitoring and control of one or two pumps. It is designated primarily for municipal pumping stations. The software included in the EC 531 is a further development of the PC 441 advanced surveillance systems.

Pump controller type ABS PC 441

Features and benefits
The PC 441 is a monitor and controller for one to four pumps, designed mainly for use in municipal wastewater pumping stations. The PC 441 has many advanced features to minimize operating costs and increase the availability of the pumping station throughout its life cycle. It has an 16-channel analog data logger (2 weeks capacity), and provides a one-week history on counters and accumulators (run time, start count and flow), as well as a time stamp on up to 4,000 pump and alarm events.

Control panel type ABS CP 112-212 / CP 116-216

Features and benefits
These compact control panels are used with either one pump (CP 112, CP 116) or two pumps (CP 212, CP 216) conforming to ATEX. The panels are connected directly to pumps up to 5.5 kW (10 A), 3-phase and single-phase versions, and provides LED indication of power, pump run and alarm. The choice of water level control includes float switches, an analog (4-20 mA) sensor and built-in pressure sensor for closed or open air systems. CP 116-216 have an 8-channel analog data logger (2 weeks capacity), and provides a one-week history on counters and accumulators (run time, start count and flow), as well as a time stamp on up to 4,000 pump and alarm events.

For information about the full range, visit www.sulzer.com
Accessories and software

Float switch type ABS KS

Features and benefits
The KS float switch, used in liquids for control or signal activation, operates in response to the liquid level. It is also suitable for use in sewage and for automatic level control. The KS float switch is impact- and shock-resistant, mercury-free, and environmentally friendly.

ABSEL – Sulzer’s wastewater pump selection program

With ABSEL, you can select specific pumps by configuring the application area, pump series and duty point using the “Hydraulic selection” function. Alternatively, you can navigate through our pump offering by using the “Pump browser”.

Once you have selected a pump, you have the option to download complete product information in PDF format with pump and motor performance curves, a product description, dimensional drawings, operational cost calculations and data sheets.

You can also run a friction loss calculation on dry or wet well applications using the “PipeCalc” function. The “PipeCalc” database contains a wide variety of predefined pipes and fittings such as elbows, valves, transition pieces, inlets and outlets. To provide a first calculation in seconds, the “PipeCalc” function offers you a predefined piping arrangement in a pumping station.

The easy way to navigate in building information modeling (BIM)

Building information modeling (BIM) is an intelligent process for improving collaboration between end users and suppliers in terms of OPEX costs. We have collected the BIM models you need for our lifting stations and submersible pumps in a single location, BIM search at www.sulzer.com/bim. Use the filter to find your product of interest or make a direct entry of the product name.
This brochure is a general presentation. It does not provide any warranty or guarantee of any kind. Please, contact us for a description of the warranties and guarantees offered with our products. Directions for use and safety will be given separately. All information herein is subject to change without notice.
