Compact, submersible recirculation pump type ABS RCP is designed for pumping activated sludge in treatment plants during the nitrification and denitrification process, as well as for the pumping of storm, surface, and river water.

**Construction**

The submersible recirculation pump type RCP is designed as a compact, water-pressure-tight unit, including propeller and bracket with well proven automatic coupling system using a single guide rail. The single guide rail coupling system guarantees quick and economical installation to a DIN-flange. The RCP is available in cast iron (EC) and optional in stainless steel (CR).

Maximum allowable temperature of the medium for continuous operation is 40 °C.

**Motor**

Squirrel cage, 3-phase, 4-pole, 50 Hz. Protection type IP68, with stator insulation Class F (155 °C), max.submergence 20 m.

**Propeller**

Technically optimized, axially operating 3-blade propeller with very good self-cleaning effect for vibration-free operation. The propellers are designed to achieve high thrusts and therefore a high flow capacity in axial direction.

**Solids deflection ring**

The patented solids deflection ring protects the mechanical seal from damage by ingress of solid or fibrous matter.

**Bearings**

All bearings are lubricated-for-life and maintenance-free, with a calculated lifetime of more than 100 000h.

**Gearbox**

High-efficiency planetary gearbox, fatigue strength with a calculated lifetime of more than 100 000h.

**Shaft sealing**

Mechanical seal: Silicon carbide / Silicon carbide.

O-Rings / lip seals: NBR.

**Seal monitoring**

DI-system with sensors in the oil*, motor, and cable connection chambers.

**Temperature monitoring**

TCS-Thermo-Control-System with thermal sensors in the stator that open at 140 °C.

**Cable**

10 m sewage-resistant material.

Optional lengths (m): 15, 20, 30, 40, 50.

**Options**

Explosion-proof version, seals in viton, cable protection sleeve, shielded cable, PTC or PT 100 in the stator.

**Weight**

With motor A 110/4 - 280 kg.

With motor A 150/4 - 285 kg.

With motor A 220/4 - 315 kg.

* not in Ex version.
