

Sulzer MellapakEvo™ Packed for Evolution!

The new Sulzer MellapakEvo™ structured packing, in combination with advanced MellaTech™ column internals, delivers unparalleled performance improvement for your columns. Verified at an independent testing facility, this latest mass transfer technology is proven to enhance column performance in both capacity and efficiency.

Key features

- Optimized packing geometry
- Enhanced liquid spreading and liquid surface renewal
- Improved vapor-liquid interactions
- Superior mass transfer and hydraulic performance

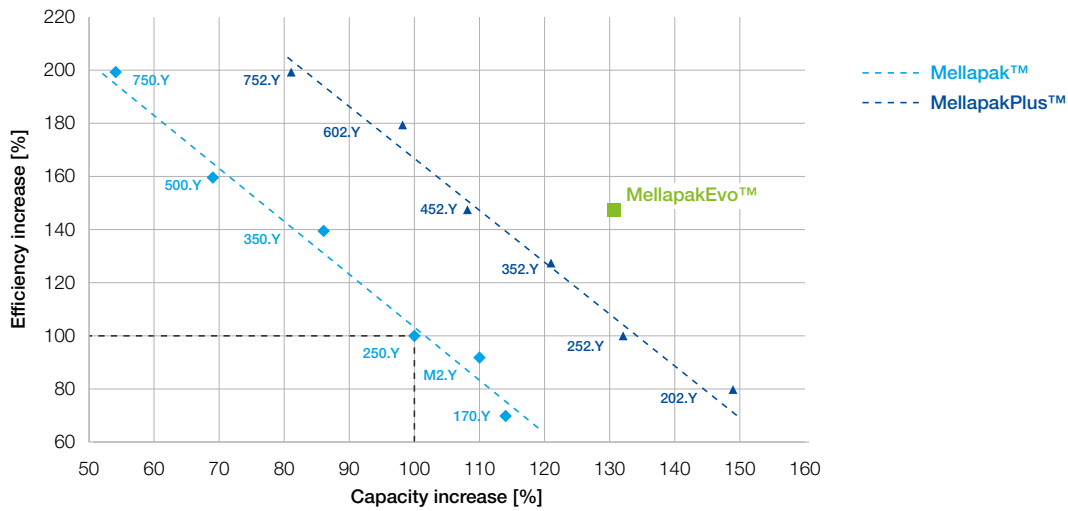

Key benefits

- Up to 40% more efficiency compared to MellapakPlus 252.Y at similar capacity
- Up to 20% more capacity compared to MellapakPlus 452.Y at similar efficiency

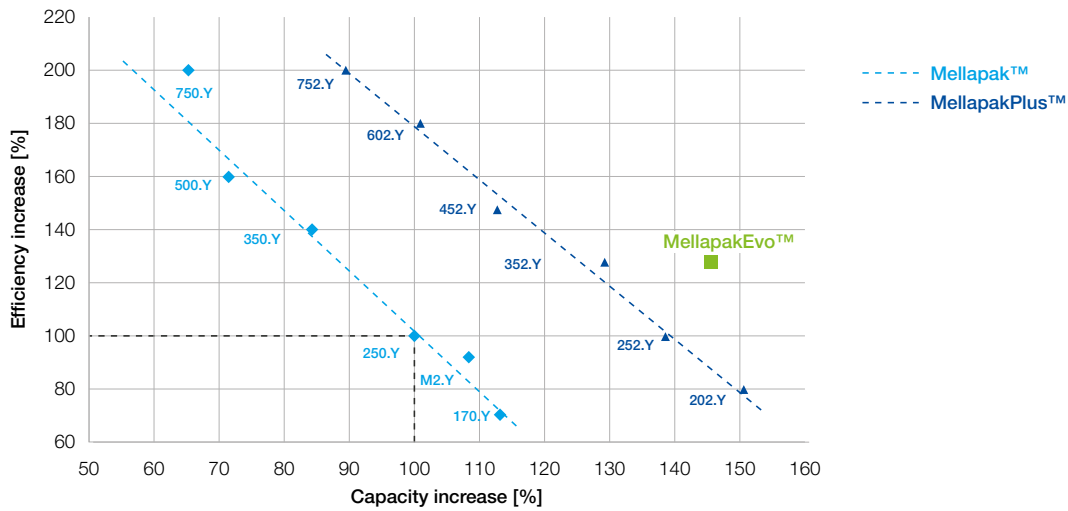

Columns packed with our latest structured packings and column internals will benefit from higher productivity, product purities and product yields, while simultaneously improving process sustainability by enhancing cost and energy efficiencies.

Contact Sulzer for a full technical analysis tailored to your needs.

For vacuum operations:

For atmospheric operations:

Improvement in capacity and efficiency performance of MellapakEvo, first member of the new product family, tested based on standard organic test mixture under total reflux condition, in combination with advanced MellaTech™ technology.
