Solutions to let you focus on your core business

We are continually growing our services portfolio to keep your business running efficiently with parts and new equipment availability and support services to minimize repair times and reduce downtime.

Sulzer is an executive flagship distributor of GE motors and parts and our agreement with GE Power Conversion has made us an authorized GE parts, new equipment, and service provider. With the agreement, GE electrical equipment, such as motors and generators, can be maintained and repaired through Sulzer's extensive service center network.

Sulzer is also collaborating with Nidec Industrial Solutions to provide customers with high performance, energy efficient drives with class-leading maintenance services.

Sulzer's extensive network of service centers throughout North America will provide expert, local support from one of the world's leading independent repair specialists of electromechanical equipment. The agreement with Nidec Industrial Solutions will see Sulzer to provide both sales and technical support for MV drives with a focus on the oil and gas industry in the United States and Canada.

Sulzer's experienced field service teams offer expert support on site, while the local service centers that are equipped with modern repair facilities will ensure any downtime is minimized. At the same time, Sulzer's customers will have direct access to high-quality MV drives and excellent OEM support.

Contact our sales representative to learn more on how Sulzer provide electromechanical worldwide and round-the-clock expertise.
