

# Servicecenter in Stockholm

## Sales, service, spareparts and rental

Our team has served Stockholm area and east of Sweden under different names for more than 20 years. We offer repairs, installations and sales of our own products, but we also handle other brands with the same technical expertise. We either service your products in our workshop or out on the field.

In our workshop we provide rental of drainage, sludge and sewage pumps. We have pumps, control units and spare parts in stock. We also offer service agreements and alarm management.

For more information, please contact us below or at  
**+46 10 130 17 20.**

We look forward to be at your service!
