

# Madrid-Algete service center

Sulzer is a leading manufacturer of centrifugal pumps and the high quality of our products, services and innovative solutions is recognized worldwide. Our mission is to improve the processes and profitability of your business. Our service centers respond to all your needs and prioritize the operational reliability of your rotating equipment. Our global network of service centers makes Sulzer your ideal partner for local services.

## Facilities and resources

The team of experts at the service center have a comprehensive selection of tools and equipment, as well as inspection and assembly areas, to facilitate a broad range of service activities. The supply of spare parts is efficiently managed by Sulzer's global manufacturing network. The technical office and sales personnel at our headquarters in Madrid can resolve the vast majority of hydraulic, mechanical and metallurgical problems. For more complicated projects, Sulzer's engineering and technology teams can lead mechanical and hydraulic development projects.

## What we do

- Repair and recondition all types of rotating equipment (Sulzer and other brands).
- Upgrade equipment materials to meet changing process requirements.
- Provide staff to conduct on-site overhauls, installations, commissioning and inspections.
- Emergency response 24 hours a day.
- Customized engineering solutions to improve equipment operation and performance.
- Long-term maintenance contracts.
