

Melbourne service centre

Sulzer is your global partner with reliable and sustainable solutions for your key operations. You benefit from a local service provider with global experience in the repair and maintenance of all types of rotating equipment. In Australia, you are supported by an extensive network of seven service centres located across the country.

Discover newfound performance and longevity for your equipment at the Melbourne service centre in Victoria. The facility supports key industries locally including mining, rail, power generation and heavy manufacturing industries. Projects are completed by highly experienced engineers and technicians and are complimented by local field service engineers.

Benefit from our comprehensive service offering

- Repair, overhaul and rewind services for a wide range of motors and generators
