70

years in Brazil
anos no Brasil

Sulzer is your reliable service partner in Brazil

Our comprehensive facilities in Brazil are fully equipped to overhaul and repair all types of rotating machinery. With the support of Sulzer global network of parts manufacturing centers and engineering and technology groups, we are your best service partner for spare parts and industry leading mechanical design and hydraulic development support.

Implementing a cost effective and efficient maintenance regime requires an experienced and reliable partner that has the necessary expertise and facilities.

Sulzer is celebrating 70 years since it started operations in Brazil with its first pump manufacturing site in São Bernardo do Campo, São Paulo. Today, Sulzer offers dedicated and superior service solutions to the oil and gas sector for customers around the world.

- Turnkey rotor repair and overhaul
- Refurbishments and upgrades
- Parts replacement
- Component repair
- Lifetime assessment
- Gas-liquid and liquid/liquid separation technology
- Turnkey services for separation columns
- Rapid response and field service
- Service agreements

Equipment downtime means lost profit. Sulzer understands this and delivers reliable, high quality, round-the-clock service solutions supported by world-class technical expertise.

The Sulzer Brasil S.A. family

The Sulzer advantage

Supported by an extensive global network of service centers and highly competent engineers and customer support services team, customers can rely on optimized pumping process, separation and mixing technology and solutions, operational reliability as well as high performance of their rotating machinery, regardless of the original manufacturer.

Capabilities

- GE Frame 6 gas turbine services
- Compressor services
- Pump retrofits and repairs
- Ultra-precise mechanical machining
- Design and manufacture of separation columns
- Round-the-clock emergency response coverage
- On-site field service personnel

Facilities

- Complete service offering for turbo equipment
- 1'500 m² Jundiaí Service Center – São Paulo
- 1'800 m² Macraé Service Center – Rio de Janeiro
- ISO certification 9001:2015, 14001:2015 and OHSAS18001:2007

Your partner

- Optimize your operational efficiency with customized solutions
- Enhance your competitive advantage through energy efficiency, improved production output and extended maintenance cycles
- Providing access to the expertise and facilities available from the worldwide Sulzer network

Sulzer Chemtech offers innovative cost-saving solutions for the complete upstream processing train: systems for gas, oil, produced water and sand separation and processing.

In-house pump design and manufacturing facilities deliver efficiency and reliability to the oil and gas sector.

Expert turbine repair services are supported by precision machining and specialist coating facilities.
