

Secure your peace of mind Get HSR Care Complete

The HSR turbocompressor is radically different from most other air compressors in the world. No mechanical friction and no mechanical wear mean high performance with no degradation over time and no inherent need for overhauls. Hence it is clear that it needs a different approach also when it comes to maintenance and service.

With traditional equipment it is important to e.g. regularly change oil and wearing parts. With the HSR it is important to put the data collected by sensors and controls to good use. This entails both preventing otherwise escalating issues and optimizing operation for performance and longevity. Unnecessary site visits as well as over-servicing will be eliminated giving significant benefit to both your financial result and the global environment.

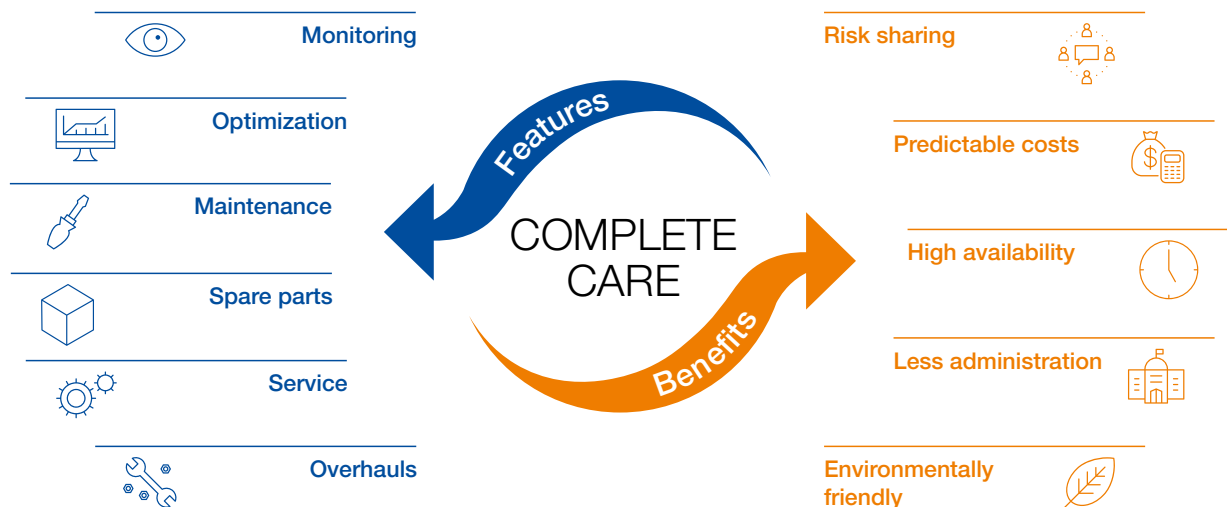

Keep your HSR turbocompressor running with HSR Care Complete, our on-site full-service package

Your Sulzer HSR turbocompressor represents a major investment in efficiency and low environmental impact. You will want to make sure that the benefits come your way, every day.

With our on-site, full-service package you get maximum security that your operations can continue uninterrupted. We will remotely monitor, check, maintain and service your HSR turbocompressor to the highest standard. When a problem is detected, we can usually fix it online without undue delay, possibly with no disruption of service.

In the rare event of a breakdown, we can pinpoint the problem remotely, in order to have the right technicians with the right parts and tools on-site at maximum speed, address the issue in one go and have your HSR turbocompressor up and running without undue delay.

Our Care Complete package is unique in the industry. For a fixed fee you get end-to-end coverage that includes all consumables, spare parts, labour and travel expenses. Our trained and highly skilled experts are always on call to help you in any situation and answer your questions.

Some things to consider...

The HSR Care Complete package works as an insurance policy

Nobody wants to think about what can go wrong. We are optimists and want things to go as planned. We are convinced that the risk that something will go wrong with your HSR turbocompressor is smaller than with any comparable product of traditional design. Even if we do our best we can never eliminate all risk and therefore we propose that you share the risk with us by signing up for the HSR Care Complete package.

A significant part of this package is the security that if the HSR develops any kind of problem during the covered years of operation* there will be no financial hit to your operation.

The importance of knowing costs in advance

With our HSR Care Complete package, you just pay an annual fee to get end-to-end coverage that includes all consumables, spare parts, labour and travel expenses. There are no hidden surprises, no rude shocks, no unbudgeted repair bills. You know what you're going to pay for, upfront.

HSR Care Complete package versus buying service and maintenance when need arises

"If it isn't broken don't fix it" may be a good rule in some areas of life, but you already know that it is not a recipe for keeping machinery in good repair. As any modern, integrated, high-technology equipment the HSR turbocompressor relies on the different subsystems to work together in the expected way. Thus a single dirty filter, clogged drain or faulty thermostat may cause the machine to behave erratically. Exchanging parts before they expire based on condition or fleet statistics makes a lot of sense.

Don't leave it to chance, leave it to the experts

Your HSR turbocompressor is built to last. Make sure you keep it going that way. With our HSR Care Complete package, our team of skilled experts are always available to support you in any situation. You can count on them to keep your HSR Turbocompressor running in optimal condition all year long – for years to come.
