

Carry Case J 12

General

Time is the most critical factor in situations calling for a dewatering solution. Sulzer offers a carry case kit including everything needed for a fast, easy and safe installation.

The complete carry case kit is simply lifted of a truck and brought to where it is needed. For emergency situations all equipment are on site such as pump, discharge connection, hose, couplings, lifting rope and extra accessory for low level pumping. When pumping is ended it is easy to put parts back in the carry case and safely bring it back to the truck or to the next site.

Application

The carry case offers:

- Fast and easy installation - all equipment included such as pump with discharge connection, hose and couplings, lifting rope and low level pumping adapter.
- Ergonomic handle makes it easy to carry and safe to lift off a truck.
- Sturdy frame protects equipment during transport and simplifies storage.

The carry case is available as a standard kit:

Kit		P/N	Weight
J 12 W	230 V, 1-phase, 50 Hz, with plug	00831759	32 kg
J 12 WKS	230 V, 1-phase, 50 Hz, with plug	00831760	32.5 kg
J 12 D	400 V, 3-phase, 50 Hz, with plug	00831761	32 kg
J 12 DKS	400 V, 3-phase, 50 Hz, with plug	00831762	32.5 kg

Equipment included in kit	Quantity	P/N
Pump	1	Volt and phase as above
Discharge connection 2" hose	1	61170132
Carry case	1	00831704
Hose 2"	10 m	15030057
Hose clamps	2	15070047
Bottom suction adapter	1	31400611
Rope 20 m	1	00831253
