

**Your Service Partner for
Contract and Predictive Maintenance**

Cost Reduction

Sulzer is a global partner with reliable and sustainable solutions for your key applications. We offer repair and maintenance services for your pumps, turbines, compressors, generators, and motors from one access point. Operating one of the largest service networks in the industry, Sulzer is close to you with more than 100 service locations and more than 3,600 employees around the world. We focus on lifetime extension and performance improvements of your rotating equipment.

In today's increasingly competitive environment, users of rotating machinery look to reduce costs while improving the efficiency and reliability of their processes.

As a core part of many industrial processes, rotating machinery can have both positive and negative impact on costs and overall performance. Managing service and maintenance of such equipment is critical to efficiency. Traditional in-house maintenance requires dedicated staffing and fully equipped workshops. Outsourced contract and predictive maintenance provides a cost and time-effective solution that allows you and your staff to focus on your operations.

As an acknowledged leader in its field, Sulzer is ideally prepared to take on your maintenance needs and deliver measurable benefits to your operations, including:

- Expert staff dedicated to maintaining your equipment
- No impact on your head count
- Our service center facilities save you the need for on-site workshop infrastructure
- Upgrades developed by our specialists provide enhanced performance, efficiency and reliability

Maintenance from the specialist

Our contract and predictive maintenance agreements tailor services to individual needs.

With contract maintenance, we undertake regular pre-defined maintenance visits to check and report on equipment. We handle repair work during scheduled maintenance periods. Agreements often include coverage for emergency repair services.

Predictive maintenance takes service to the next level. By continually monitoring pump conditions, we are able to predict maintenance needs and create savings by under-

taking work only when it is needed. When increased maintenance is indicated, we take steps to modify equipment, procedures and process systems to improve operational life and avoid breakdowns.

Whatever your requirements for the maintenance of rotating equipment, Sulzer is your ideal partner to deliver increased performance and reduce costs.

Your local Sulzer representative can provide further information on our contract and predictive maintenance services.
