

# Submersible Grinder Pump Type ABS Piranha 08 - 125

# SULZER

Submersible pumps for problem-free pumping of sewage containing faecal matter in pipe lines from 1¼" (DN 32).

## Applications

Piranha submersible pumps have been designed for effective and economic dewatering using discharge lines of small diameter, in private, municipal and industrial areas.

- Sewage removal from living units and houses in remote settlements where the laying of a conventional sewer would be too expensive, where large ground undulations are present or where it is only possible to lay pipe lines of small diameter.
- Sewage removal from motorway resting sites, communal buildings and for renovation of buildings or areas of a city.
- For use in slaughter houses, food processing plants, paper factories, agriculture and similar areas.
- Piranha 08 and 09 are specially designed for private and domestic applications.
- Maximum allowable temperature of the medium is 40 °C, or short term to 60 °C (max. 5 minutes).

## Construction

The water pressure-tight, encapsulated fully flood-proof motor and the pump section form a compact, robust, unit construction.

## Bearings

The stainless steel motor shaft is supported in lubricated-for-life ball bearings.

## Shaft sealing

**Piranha 08 - S30:** Between motor and hydraulic section by means of a high quality sealing unit using a silicon carbide mechanical seal. Seal at motor side is by oil lubricated lip seal.

**Piranha PE25/2C - 125/2E:** Double mechanical seals, SiC-SiC at the hydraulic side, SiC-C at the motor.

All seals are independent of direction of rotation and resistant to temperature shock.

## Discharge

**Piranha 08 and 09:** DN 32 flange with G 1¼" internal thread.

**Piranha S10 - PE45/2C:** DN 32 flange (G 1¼" threaded adaptor available as accessory).

**Piranha PE80/2E - PE125/2E:** DN 50 with DIN-flange.

## Shredding system

Spiral bottom plate and stationary cutter ring combined with a shredding rotor located before the impeller, for optimum blockage-free running.

## Temperature monitoring

Thermal sensors in the stator to switch off the pump in the case of overheating and switch on automatically after cooling down. Temperature and leakage relays are required (see accessories table).

## Seal monitoring

DI system consisting of a sensor in the motor and oil chambers which signals an inspection alert if there is leakage at the shaft seals. Not available for Piranha 08 and 09. Temperature and leakage relays are required (see accessories table).

## Features

- Unique Piranha shredding system capable of shredding items such as cloths and plastic bags.
- For the pumping of wastewater containing sewage, offal, organic and industrial effluent.
- Piranha 08 and 09 fitted with MF modular motor; Piranha-S with AS, Piranha PE with XFP Premium Efficiency IE3.
- Small discharge lines from 1¼" (DN 32).
- Installations are possible where large ground undulations are present.
- Standard and Ex-versions (see motor data below).
- Piranha 08 and 09 have capacitor in upper lid and do not require a control box.
- Low installation costs due to small diameter discharge pipework.

## Motor

Three-phase 460 V or single-phase 230 V, 60 Hz, 2-pole (3400 r/min) or 4-pole (1750 r/min).

Cooled by amply dimensioned cooling areas.

**Piranha 08 & 09:** insulation class F, protection type IP 68, non-Ex only.

**Piranha S10 - S30:** insulation class F, protection type IP 68, Ex and non-Ex.

**Piranha PE25/2C - PE125/2E:** Premium Efficiency IE3 with NEMA Class A temperature rise, insulation class H, protection type IP 68, Ex only.

Explosive-proof versions are in accordance with international standard ATEX II 2G Ex db IIB T4 Gb.

**Types of operation and frequency of starting:** Piranha-S has been designed for intermittent use only (S3, 25%) when dry-installed, and continuous use (S1) when submerged.

Pumps of the Piranha-PE series have been designed for continuous operation S1 when either submerged or dry-installed

\* Piranha 08 and 09 flange has internal thread. Piranha S10/4 - PE45/2D-C has threaded flange adaptor as optional accessory.

\*\* P<sub>1</sub> = Power at mains; P<sub>2</sub> = Power at motor shaft.

\*\*\* Weight with 15 m cable

<sup>†</sup> Start and Run capacitor to the following specification required in control panel:

**Start:** 161-193µF for S10/4W & S20/2W, 200µF for S26/2W.

**Run:** 30µF for S10/4W, 20µF for S20/2W, 50µF for S26/2W.

The recommended start time for the motors is two seconds.

## Performance curves

H = Total Head; Q = Discharge Volume.

Curves to ISO 9906

N.B. please use the ABSEL program to validate pump selection.

## Dimensions (mm)

**Piranha 08 - PE125/2E:** Minimum sump opening  $\varnothing$  625 mm.  
Pedestal base secured using M10 masonry anchor bolts, drill hole size 14 mm.  
\* Lowest switch-off point for automatic operation.

**Piranha S10/4 - S30/2:** \*\* To allow the pump to be lowered and fixed correctly to the pedestal, the shackle must be fixed to the handle at the point furthest from the guide rail.

**Piranha PE80/2E - PE125/2E:** Discharge line connection with threaded flange DN 50/2" PN16.  
Discharge elbow supplied by customer.  
\*\*\* Hexagon head wood screw 10 x 70 DIN 571 and dowel size 12.
