## Sulzer Sense – smart monitoring for your equipment

---

In industrial operations, your equipment speaks – but only if you know how to listen. Sulzer Sense monitoring solution gives your machines a sixth sense, providing insights your eyes and ears can't receive. It detects subtle changes in vibration, minor rises in temperature, and early signs of wear, predicting possible failures long before they happen. Sulzer Sense is more than monitoring, it's data-driven intuition.

With Sulzer Sense, your pumps, mixers, motors, and agitators become intelligent assets. You move from reactive to proactive maintenance. From uncertainty to confidence, which reduces surprises, costs, and downtime.

---

## From awareness to action – Sulzer Sense in motion

---

Sulzer Sense combines wireless mesh sensors, secure cloud analytics, and expert lifecycle services into one seamless ecosystem. It works with all rotating equipment regardless of brand, and scales effortlessly.

But the real power lies in what it understands. Sulzer's advanced analytics interprets data, not just collects it. It identifies risks, guides root cause analysis, and helps you act fast.

And all this connects through the Sulzer customer portal, your digital hub for smarter operations. Access condition data, documentation, spare parts, and lifecycle records. Streamline maintenance, support compliance, and eliminate guesswork.

**Your team is always connected, informed, and empowered.**

---

# Tailored service packages – your path to reliability

## Self-service – your management, smart monitoring

The self-service model provides everything needed to get started: wireless sensors, gateways, and the Sulzer Sense portal. You manage installation, monitoring, and maintenance while Sulzer offers remote support when needed. It is a cost-effective way to bring smart monitoring to your operations.

## Turn-key solutions – effortless condition monitoring

Experience a seamless solution from day one. We take care of planning, installation, configuration, updates, and assist you in integration. Throughout the contract period, Sulzer remains responsible for the technical functionality of the system, ensuring it runs smoothly and reliably. You can focus on monitoring and decision-making; we handle the rest.

## Remote monitoring support – improved predictive maintenance

Access Sulzer's deep expertise in rotating equipment, industrial processes, and smart analytics – without outsourcing the monitoring itself. Your team manages the data, while we help you interpret it, validate anomalies, and make informed decisions. Strengthen your predictive maintenance with expert backup.

## Lifecycle services – partnering for peak performance

For full-service reliability, choose Sulzer's lifecycle services. We monitor, maintain, and repair your assets under a tailored service level agreement. Benefit from regular health reports, maintenance recommendations, and field services. Ensure long-term performance, minimize emergency repairs, and maximize asset value – while Sulzer keeps your operations running.
