SULZER

Abu Dhabi
Service Center

Around-the-clock engineering services for all kinds of pumps, turbomachinery and rotating equipment.

World-class engineering services

Sulzer's Abu Dhabi Service Center combines local engineering support with the expertise provided by our global service network. Strategically located in the UAE close to key logistics hubs, the center provides convenient access for customers across the region.

The state-of-the-art workshop supports repairs and overhauls for all kinds of rotating equipment, with dedicated facilities for precision inspection, chemical cleaning, balancing, and assembly.

Our in-house and on-site engineering solutions help improve:

- Reliability
- Efficiency
- Profitability
- Sustainability

Pump Services (PS)

Comprehensive pump engineering expertise supports repairs, full overhauls, retrofits and servicing for any brand of pump.

Turbo Services (TS)

As an independent service provider, Sulzer offers complete overhauls of aeroderivative and industrial gas turbines and steam turbines, alongside expert support for compressors and turbo expanders.

Workshop capabilities and field support

Our Abu Dhabi Service Center offers repair and maintenance, diagnostics and consulting, upgrades and long-term service agreements for rotating equipment from all OEMs.

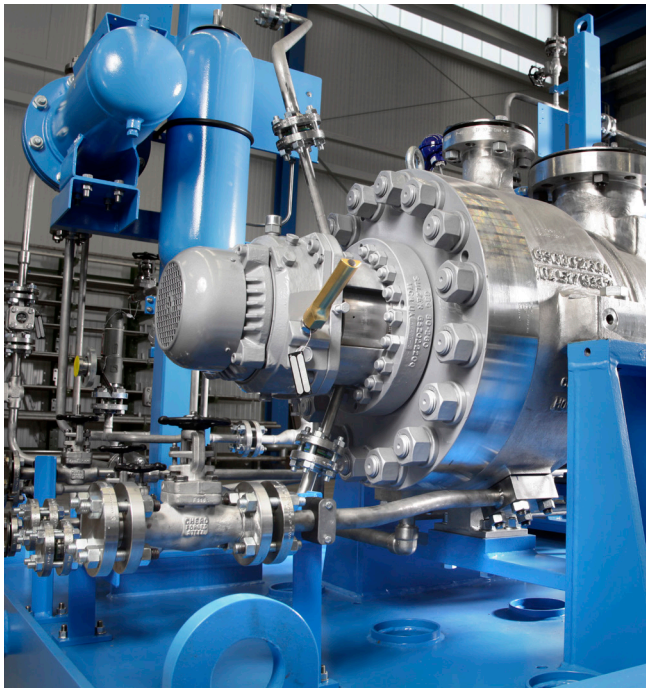

Workshop facilities

- Dual overhead crane system rated at 20/10 tonnes and 5/5 tonnes
- 3-tonne horizontal and 300 kg single-plane balancing machine
- Dedicated clean assembly facility for critical components and rotating equipment
- Climate-controlled quality assurance and quality control facility for precision measurement and inspections
- Extensive storage, staging and project management areas to support large jobs
- Large dedicated chemical cleaning facilities, including submersion tanks and overhead crane

Engineering and field services

- 24/7 response to unexpected downtime
- Radiographic, liquid penetrant and ultrasonic testing
- Magnetic particle inspection
- Equipment diagnostics and vibration analysis
- Shaft concentricity checks and seal leak testing
- Re-engineering, component development and upgrades
- In-house rapid parts manufacturing and fabrication
- Shot-blasting, vapour-blasting, and painting
- Portable field service
- Field service engineers for turnkey solutions and on-site delivery
- Full overhauls of pumps, compressors, gas turbines and steam turbines
- Repair and servicing of motors, generators, gearboxes and blowers
