

Bintulu Service Center

With more than 190 years of engineering heritage, established global and localised capabilities for providing services across critical industries, Sulzer is your ideal local service partner in east Malaysia. We deliver customized solutions that maintain your rotating equipment, pumping processes and operations in response to today's operational and sustainability challenges. In Borneo, you are supported by our service center located in the heart of east Malaysia's energy corridor – Bintulu.

In view of rising demand for responsive and expert rotating equipment services with high technical competency requirements, Sulzer has invested its first workshop facility in east Malaysia at Bintulu, providing responsive services with quick turnarounds, especially for **selected** pump models through our OHX and BBX kits, which can cut turnaround time by 50%. The facility supports energy intensive industries such as Oil & Gas and Power generation, and is strategically placed to support the growing ambitions of the energy industries in east Malaysia and Brunei, bolstering operational reliability and efficiency.

Services highlights

- Centrifugal pump services for all brands
- Energy efficiency solution
- Service center retrofit
- Field services for inspection, troubleshooting, failure analysis, installation, start-up and commissioning
- Heavy industrial steam turbine overhaul and repair

Access to our regional capabilities, backed by an impeccable track-record

25+
years of experience

2000+
pumps serviced &
retrofitted

1550+
gas and steam
turbines serviced

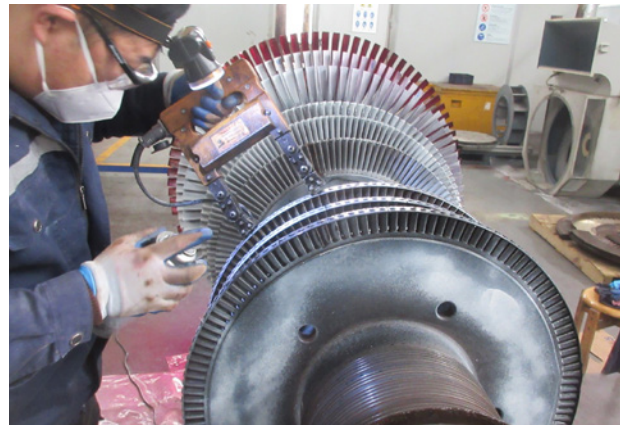

Pump Services

- Inspection and analysis
- Troubleshooting
- Maintenance, overhaul and field services
- Retrofit
- Reverse engineering
- Additive manufacturing
- Field services
- Aftermarket spare parts
- OEM-X line
- Energy efficiency
- Bluebox
- Customer service agreements
- Sulzer Academy of Pumps Training

Turbomachinery Services

- Maintenance, overhaul and field services
- Rotor repairs
- Root-cause analysis
- Inspection and analysis
- Troubleshooting
- Aftermarket spare-parts
- Reverse engineering
- Retrofit
- Coatings

Specifications & equipping highlights

- Floor area: 240 sqm
- Overhead crane: 1 x 15 tonnes
- Forklift: 3 tonnes
- High precision lathes: 2m x OD 500mm
- Balancing machine: 1 x 5.5 tonne and 1 x 300kg
- 3D scanner
- Vertical drilling machine
- Sand blasting cleaning facility
- Lathe machine
- Vibration and thermal measurement tools
- Complete welding equipment
