

Sulzer Advanced Manufacturing Center, Johannesburg

Sulzer is a world-renowned global pump OEM and an independent service provider for all types of rotating equipment. Providing first-class products, services and system solutions to improve critical processes, Sulzer boosts efficiency, reliability and value for its customers.

Our Advanced Manufacturing Centers produce Sulzer spare parts for pumps to the highest standard. State-of-the-art tools, rigorous quality control processes, and high manufacturing capacity combine to provide superior components through a highly resilient supply chain.

Resources and facilities

Our comprehensive workshop facility in Johannesburg is equipped to repair, overhaul and improve all types of rotating machinery, allowing us to support the complete drivetrain. This capability is complemented by advanced parts manufacturing, which delivers Sulzer-quality spares locally and via our global network. Technical sales personnel and experienced engineers are poised to solve your electromechanical, hydraulic and metallurgical problems.

In-house competencies are paired with comprehensive field services. Our teams are adept at planning, managing and executing projects of any size. Consequently, the Sulzer Advanced Manufacturing Center, Johannesburg, is a trusted provider to the power generation, mining, renewable energy, utilities and industrial markets in South Africa and beyond.

What we do

- Repairs, refurbishments and retrofits for all types of rotating equipment from any brand (Sulzer and non-OEM)
- Advanced manufacturing of Sulzer quality spare parts for pumps
- Highly responsive 24/7 emergency breakdown support
- Skilled field service personnel for project management, troubleshooting, diagnostics, on-site overhauls, installation and commissioning
- Tailored engineering solutions to enhance equipment reliability, efficiency and effectiveness
- Reverse engineering to support legacy assets
- Long-term service agreements (LTSA's)
- Specialists for high energy pumps
- Largest pump testing facility in Africa with almost 80 years in operation
