

La Plata Service Center

Sulzer is a global leader in fluid engineering and world-class independent services provider for all types of rotating equipment. With a reputation for innovation and engineering excellence, Sulzer delivers high-quality products, services, and system solutions that enhance efficiency, reliability, and value for customers worldwide. Our mission is to support industries with expert solutions that keep critical processes running smoothly and profitably.

Sulzer's field service teams bring expert engineering support directly to customer sites, delivering high-quality maintenance and repair solutions around the clock. Whether responding to unexpected breakdowns, planned maintenance, or large-scale shutdowns, our experienced professionals work efficiently to minimize downtime and keep critical operations running smoothly.

Resources and facilities

The La Plata Field Service Center is the central operational base for Sulzer's field service team in Argentina, providing rapid and reliable support for rotating equipment across the region. This facility is equipped to handle on-site repairs, planned maintenance, and emergency response for key industries. With a skilled team and specialized tools, Sulzer ensures that critical assets continue to operate at peak performance.

What we do

- Maintenance and repair of gas turbines, steam turbines, centrifugal compressors, centrifugal pumps, and gearboxes
- Videoscope inspection for internal component assessment
- Assistance during emergency plant shutdowns
- Installation and commissioning of gas turbines, steam turbines, compressors, and centrifugal pumps
- Vibration analysis
- Alignment of rotating equipment
- Repair and maintenance of generators and electric motors
- Tool and spare part containers
- Special tools and hardware for specific gas turbine models, including Hytork and others
