

Ezeiza Service Center

Sulzer is a global leader in fluid engineering and an advanced independent service provider for all types of rotating equipment. With nearly two centuries of expertise, Sulzer delivers high-quality products, services, and system solutions that enhance the reliability and efficiency of critical processes. Our commitment to innovation and customer success ensures industries worldwide receive expert engineering support, helping to optimize performance and improve throughput.

Designed to keep critical equipment operating at peak performance, Sulzer's service centers provide expert maintenance and repair solutions tailored to customer needs. With a strong global network and deep technical expertise, these facilities deliver reliable, high-quality support for rotating equipment across Argentina.

Resources and facilities

The Ezeiza Service Center provides advanced repair and maintenance services for rotating equipment. This 2'600 m² facility offers specialized support for turbomachinery and pumps, ensuring high-quality service and rapid response for customers across Argentina. With a commitment to reliability and performance, Sulzer is continuously investing in the region, delivering industry-leading engineering solutions.

What we do

- Repair and maintenance of Sulzer and non-Sulzer pumps, including centrifugal and vertical units
- Overhaul and refurbishment of compressors across phase I and II
- Precision repair of gas turbine blades, transition parts, nozzles, liners, and combustors
- Robotic application of plasma and HVOF coatings for enhanced durability
- Inspection and repair of gas and steam turbine rotors and compressors
- Cleaning, blasting, dimensional inspections, and non-destructive testing
- Component repair including cleaning, heat treatment, welding, coating, and non-destructive testing
- In-house machining and reverse engineering
