

Sulzer Prohibited Substances List

Version 02.10.2018

Statement

Sulzer is committed to complying with regulations aimed at changing manufacturing processes and components to reduce health and environmental concerns as well as ensuring socially responsible sourcing. Sulzer's Code of Business Conduct incorporates the values of the UN Global Compact and serves as point of reference for upholding fundamental human rights, working conditions, occupational health and safety, business ethics, and environmental law throughout Sulzer's supply chains. This Prohibited Substances List applies, even when local or national laws allow use of these substances. It is each site's responsibility to observe any more stringent local or national laws applicable for Sulzer or customer locations related to the use or storage of substances to ensure full legal compliance.

The ESH group function is in charge of company-wide environment, safety, and health management, which includes defining and implementing ESH standards and initiatives identifying prohibited substances. The Procurement group function is responsible for implementing due diligence and contracting processes to ensure that Sulzer's supply chain is committed to compliance with Sulzer's requirements, including the Code of Business Conduct.

Regardless of local legal requirements which may permit legal importation and use of asbestos containing materials ("ACM") under certain circumstances, a complete prohibition is imposed against the importation, use or storage of any ACM by any Sulzer site in all circumstances involving any products, component parts, materials or consumables delivered to or received from customers/vendors, on a worldwide basis.

In addition to prohibiting the use and storage of substances on this List, Sulzer also prohibits the use of mineral substances ("Conflict Minerals") that are known to have originated from conflict-affected and high-risk areas where extraction, transport, trade, and handling of tin, tantalum, tungsten, and gold may provide direct or indirect support to non-state armed groups or enable exploitive or fraudulent activities.

DISCLAIMER: The valid Sulzer list of prohibited chemicals and substances is published and maintained on www.sulzer.com only. Sulzer cannot guarantee the validity of any printed or otherwise maintained versions of the Sulzer Prohibited Substances List.
