

ATPS GIVEAWAY DETAILS

Pump inspection and analysis package promotion ("Promotion")

The scope of the package are as follows:

Physical on-site survey

- Confirm pump duty during normal operation and under process upset conditions (flow, head, speed, balance, line flows etc)
- Recording of vibration parameters
- On-site data collection with customer's input or from operations control room
- Temperature measurement
- Suction and discharge pressure measurement
- Check mechanical seals for leaks
- Review operation of minimum flow valve or other control devices
- Check for other external leaks and abnormal noises

Recommendation Report

- Comparison of current operating conditions to the original design criteria
- Estimation of recirculation losses of balance system wear (where applicable)
- Recommendations for any changes in general operation (e.g. temperature limits)
- Recommendations to existing maintenance regimes
- Recommendations for any system or process changes
- Recommendations for stocking critical spare parts
- Proposal for pump modifications if applicable
