

SULZER

Original spare parts

Original Spare Parts

Sulzer is a global partner with reliable and sustainable solutions for your key applications. We offer repair and maintenance services for your pumps, turbines, compressors, generators, and motors from one access point. Operating one of the largest service networks in the industry, Sulzer is close to you with more than 100 service locations and more than 3,600 employees around the world. We focus on lifetime extension and performance improvements of your rotating equipment.

Using Sulzer original spare parts to maintain your equipment performance can:

- Restore high operational efficiency
- Optimize energy consumption
- Minimize unexpected failures

Original equipment spare parts can be more than a simple 'new for old' replacement. With our focus on continuous improvement, we look for opportunities to supply replacement parts that will enhance performance. Sulzer spare parts are at the heart of innovative new hydraulic and mechanical designs, that extend equipment life and reduce your maintenance costs.

For standard stock items, our consolidated warehousing and advanced logistics allow for rapid response and delivery. Sulzer original spare parts are machined to the exact profiles, tolerances and clearances for a perfect fit first time, every time. Together with our broad parts interchangeability this gives you:

- Faster maintenance and less downtime
- Reduced spare part inventories
- High equipment performance
- Parts traceability and compliance

For our standard pump ranges, modular structures enhance upgrading and maintenance. Subassemblies and kits offer fast and simple maintenance.

Advanced materials

We use high quality standard materials and advanced special materials to meet the most demanding applications and provide excellent resistance to corrosion and wear. We tailor our construction materials to the application and the pumped fluid to give you:

- Increased parts lifetime
- Longer meantime between repairs
- More reliable operation
- Fewer unexpected failures
- Reduced life-cycle costs

Sulzer also offers a full range of inventory management services to help you optimize parts stock and handling. Options range from a stock review with recommendations for improvement to complete offsite stock management to help you:

- Reduce inventory costs
- Optimize stock levels
- Free up staff from stock management
- Release stock space for other use

Your local Sulzer representative can provide further information on our original spare parts services.

The Sulzer Services division is your partner for uptime and enhanced performance for your rotating equipment and more. Our dedicated people provide unrivalled service and expertise to meet your operational needs – anytime, anywhere.

Through a network of over 100 service sites around the world, Sulzer provides cutting-edge parts as well as maintenance and repair solutions for pumps, turbines, compressors, motors and generators. We service our own original equipment, but also all associated third-party rotating equipment run by our customers, maximizing its sustainability and life cycle cost-effectiveness. Our technology-based solutions, fast execution and expertise in complex maintenance projects are available at our customers' doorsteps.
