

Sulzer Prohibited substance list - 2022

According to the Sulzer Directive referenced 2017.000075, section 4.3.b, the prohibited substance list is updated on a yearly basis. This document is the latest up-to-date list applicable at Sulzer.

The 2022 new entries in the Sulzer prohibited substance list

The update covers the period of September 2021 to September 2022.

227 chemicals have been added to the list and make the new entries. See below table for the full list.

This addition mainly results from development in the EU and Switzerland. The breakdown is as follows:

- **161 member substances** of PFOA, its salts and PFOA-related substances group have been included as listed in ECHA website in accordance with the POPs Stockholm Convention and EU POPs Regulation 2019/1021
- **35 member substances** of PFHxS, its salts and related substances group of substances are prohibited in Switzerland from October 1st 2022,
- **14 member substances** of the diisocyanates group become prohibited in accordance with Regulation (EU) 2020/1149 from February 2022. These substances initially listed in the 'Near future prohibited list' were moved back to the prohibited one.
- **12 new member substances** from the substance group 4-Nonylphenol, branched and linear, ethoxylated have been included in the Sulzer List. This addition is based on the assessment of the member substances part of this group on ECHA's website in accordance with note 2 of the revised ABB list.
- **5 additional member substances** of 4-(1,1,3,3-tetramethylbutyl)phenol, ethoxylated covering well-defined substances and UVCB substances, polymers and homologues group have been prohibited under REACH Annex XIV since January 4th 2021. This update from ECHA complements one member substance (with no CAS number) which was already in the Black list.
