

Sulzer Mixpac Ltd

Intelligent single and multi-component dispensing systems

Innovation in Application

Sulzer Mixpac Ltd

Sulzer Mixpac is the world's leading manufacturer of systems for packaging, mixing and dispensing single and multi-component materials.

The company

Sulzer Mixpac Ltd, headquartered in Haag, is part of Sulzer Chemtech Ltd. Additional subsidiaries are located in the USA, Denmark, UK and China, and ensure optimal supply and support for our customers. As part of the Sulzer Group with more than 15,000 employees, we have a strong international network behind us.

The products

Our product range includes static mixers, cartridges and dispensing equipment that are used in a combined system. All solutions provide maximum precision and quality for metering, mixing and dispensing adhesives, sealants, coatings, impression materials and dental fillings. The innovative products are safe and easy to operate, and are used in the fields of healthcare, dental, construction and industry. As an experienced Swiss manufacturer, our mixing technologies are setting standards worldwide and are leaders in the market.

The added value for the customer

Our customers have been won over by the high quality of our products and services. We accompany them every step of the way through the process of finding a solution. We start with individual consultation and collaborative development of solutions, all the while encouraging innovations and welcoming partnerships.

The added value we provide to our customers is based on the fact that we offer everything from a single source. An experienced team of specialists and market-oriented developers is continuously working on enhancing and optimizing the products. Our services range from fair drawing and in-house mold-making through to production under the highest quality standards. We have at our disposal over 160 high-precision injection molding systems, the latest production methods under different clean room conditions, a quality inspection system that runs through all areas and an ultra-modern analytical and technical laboratory. We are always working to find solutions that meet our customers' high expectations. Our top priority is sustainable management of raw materials and our environment as well as the safety of our products during use and of our employees at work. Our flexibility has allowed us to grow in size – and we have remained flexible despite our size.
