

Submersible Chopper Pump Type ABS XFP 100E and 150G

SULZER

Robust, reliable, submersible chopper pumps, with Premium Efficiency motors from 6.0 to 11.0 kW. For the pumping of heavily contaminated commercial, industrial, municipal and agricultural wastewater, sewage and sludge, in wet well installations.

Features

- The water-pressure-tight, encapsulated, flood-proof motor and the pump section form a compact, robust, modular construction.
- NEMA Class A temperature rise.
- Premium Efficiency motors in accordance with IEC 60034-30 level IE3 with testing in accordance with IEC60034-2-1.
- Continuously rated motor.
- Double mechanical seals. SiC-SiC at the medium side; SiC-C (100E) and SiC-SiC (150G) at the motor. XFP 150G has an additional inner lipseal at the motor side. All seals are independent of rotation direction and resistant to temperature shock.
- Anti-wicking cable plug solution (100E), or water-pressure-sealed connection chamber (150G).
- Hardened chopper impeller and cutter plate efficiently reduces large solids or fibrous materials to ensure optimum blockage-free pumping.
- Lubricated-for-life bearings with a calculated lifetime of minimum 50 000 hrs. (100E), and 100 000 hrs. (150G).
- Stainless steel shaft. Designed with high safety factor to prevent fatigue fracture.
- Temperature monitoring by thermal sensors (140 °C) in the stator windings.
- Seal monitoring by a moisture probe (DI) in the motor and seal chambers (100E), or motor chamber (150G), which signals an inspection alert if there is leakage at the shaft seals.
- Smooth outer design to reduce rag build-up.
- Stainless steel lifting hoop.
- DN 100 and DN 150 radial slot DIN flange discharge.
- Maximum allowable temperature of the medium for continuous operation is 40 °C.
- Maximum submergence depth of 20 m.
- Explosion-proof as standard, in accordance with international standard ATEX 2014/34/EU [II 2G Ex db IIB T4 Gb].
